

Biological Surveys

The 2009 Season Is In Progress!

Biological surveys are generally subject to seasonal restrictions depending upon the life cycles of individual target species. Most surveys must be conducted in spring or summer. Streamline Planning Consultants biologists are dedicated to helping you plan and design your project successfully. Ensure that your projects are not delayed by contacting us today!

Not sure if you need a survey? Surveys are generally necessary for the following activities:

- Proposed Development Applications
- Streambed or Wetland Alteration
- Mitigation or Restoration Projects
- Timber Harvesting
- Mining and Other Resource Extraction
- Pre-Construction and Grading

Streamline Planning Consultants offers a wide variety of services including :

Wetland Delineations • Stream Surveys • Botany & Wildlife Surveys • CEQA/NEPA Assessments • Coastal Development Permits • ACOE & CDFG Permits • Vegetation Mapping and Habitat Analysis • Ecological Restoration & Design • Mitigation & Monitoring Plans • Land Use Permits • Development Plans & Subdivisions
